# ACAR Multiple Template Web Part

## Work with different Office Templates in SharePoint

### What is the Multiple Template WebPart ?

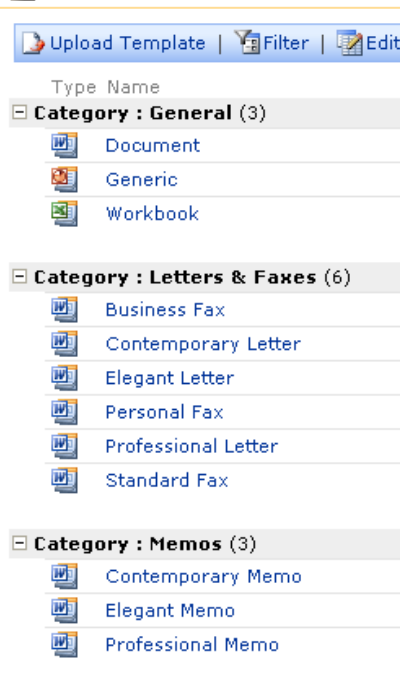

This Web Part allows you to add as many Office Templates as you like to a single document library. By default SharePoint document libraries allow only one office template per one Document Library. With this custom WebPart you can extend this limit and add as many Templates as you want to a single document library.

“This Web Part will enhance Microsoft SharePoint.” Users can click on the New Document Button in the document library and will have all the Templates available categorized. The Templates are uploaded prior to a Template Gallery. User can add this custom Web Part with drag and drop under the standard shared document library. It is very easy to use. No Administrative rights are necessary to add this feature to you document libraries under SharePoint. The Web Part works fine for SharePoint Portal Server and SharePoint Services as well.

Just try it, it is so easy to use and makes your websites under SharePoint so much richer and smarter to work. If you order the ACAR

### Multiple Templates

## About us

Information Worker Solutions

# ACAR Multiple Template Web Part

You can easily add the Office Templates to the Template Library by clicking on the **Manage Templates Library**. Upload and categorize the Office Templates.

With the Enterprise Edition of the Multiple Template Web Part you can define one **single Template Library Location** for all your company wide Templates under the Portal and all SharePoint Sub Sites can reference this Templates Library Location URL.

## You want to see it Live in Action or as a Video

If you want to see the Multiple Template Live on system, please send us an E-Mail to [info@acar.ch](mailto:info@acar.ch). We send you than an User Account with a Password for access to the site.
